

**Aftermarket
service and support
from CPC Pumps
International Inc.**

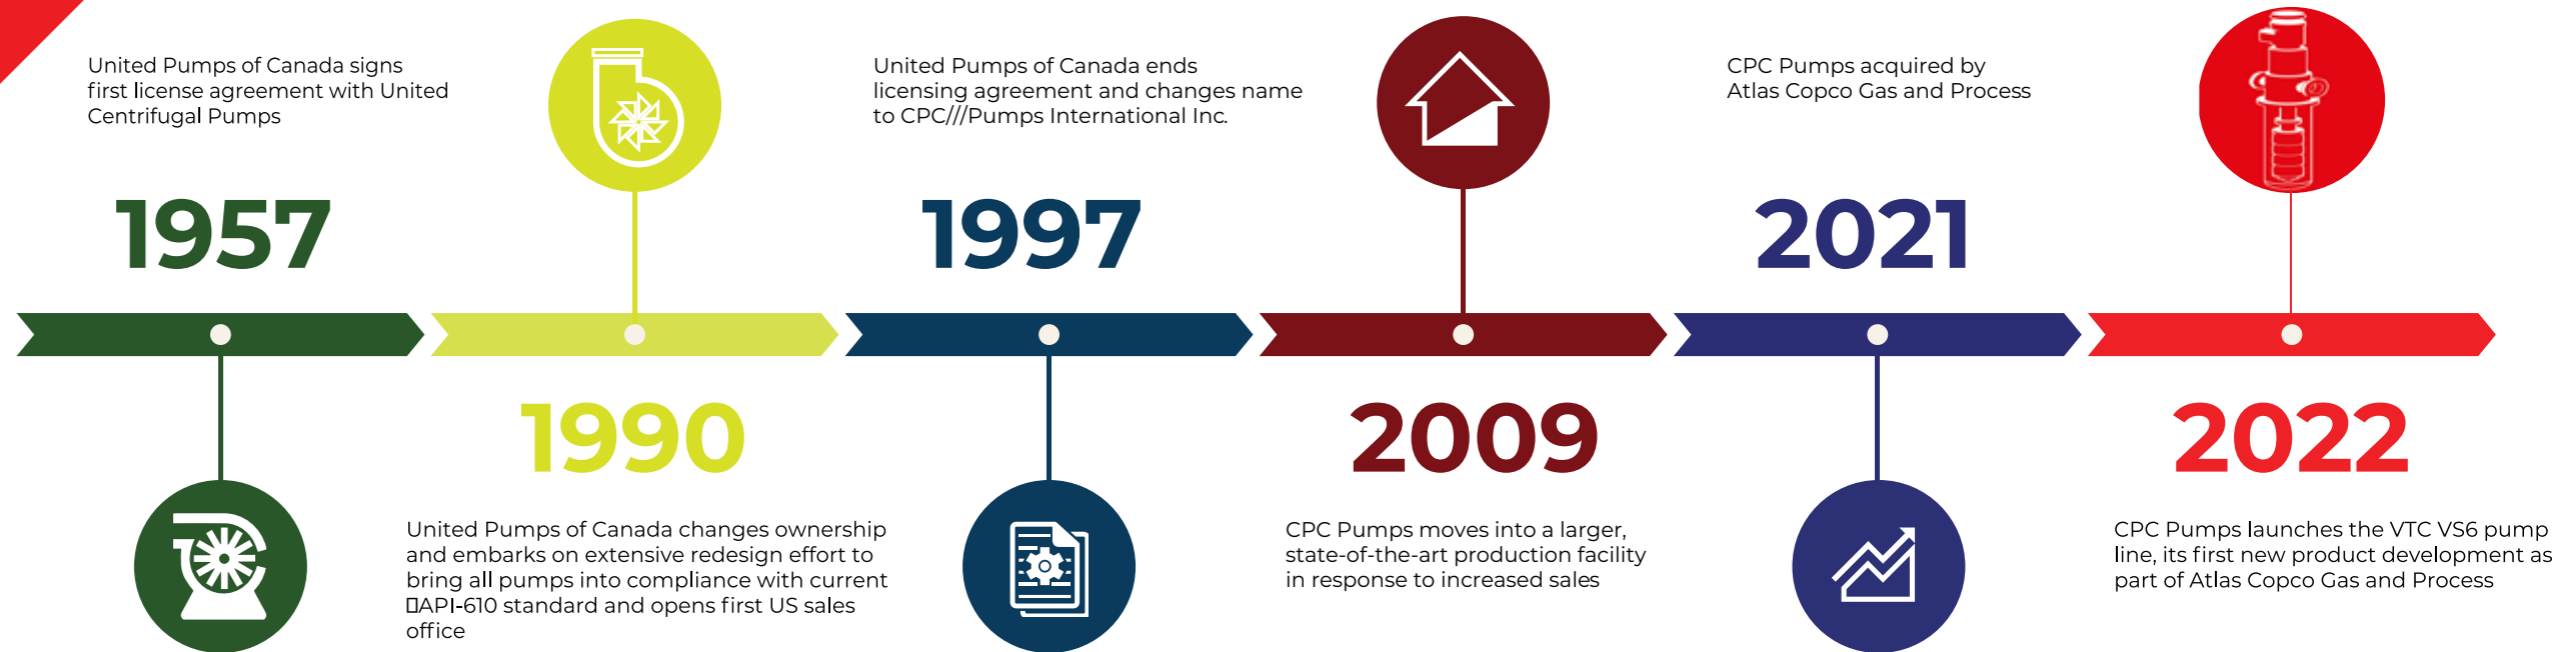

CPC Pumps International Inc.

Partnering in engineered, process-critical pump applications.

CPC Pumps International Inc. has been a provider of pump solutions for the hydrocarbon industry since 1957.

With best-in-class hydraulic performance coverage, unique design and advanced production capabilities, CPC Pumps provides our customers with tailor-made pump solutions for process-critical applications. Our focus on serving the market for fully compliant API 610 centrifugal pumps has made us a leading innovator in the hydrocarbon processing industry.

As an innovator, we always have our sights set on the present and the future. The world is quickly moving towards a circular economy and the goal of Net Zero Emissions by 2050. Many of the processes in which pumps are already used today will also be essential going forward, with CPC's technology helping to drive this transformation.

Nobody knows your CPC Pumps better than we do

New equipment sales are only part of the CPC Pumps International ownership experience. Once commissioned, we strive to be your partner by providing:

- Service and maintenance of your equipment through its entire lifecycle
- Routine inspections and preventive maintenance to make sure that your machinery is running optimally
- Factory-supported diagnostic assistance and advice
- Genuine CPC Pumps International replacement parts (manufactured in-house using your pump's unique engineering drawings)
- Capital spares storage
- Emergency repairs
- A dedication to ensuring that your investment in CPC Pumps International delivers lasting production.

Aftermarket Services Overview

CPC universal pump support

Maintenance, breakdowns, upgrades and everything in between. Our Aftermarket services group can help you keep your pumps - CPC or otherwise - running reliably and efficiently for many years.

- Capable of providing repair & service options for pumps of all makes
- Able to produce non-CPC Pumps components utilizing state-of-the-art, handheld 3-D scanners for rapid component validation
- Project management focused approach with world class experience offering unmatched adaptability and agility

Parts & Service

Genuine CPC Pumps replacement parts

Only CPC can create parts with original OEM tolerances by utilizing the original engineering drawings from your specific pumps

Many factors can affect which parts will need to be replaced on your pumps, including pump duty and location. Your Aftermarket sales manager will work with you to anticipate which items you will need through the life of your pump and create a plan to ensure long-lead items are properly accounted for.

With the global backing of the Atlas Copco Gas and Process Division, we can manufacture a diverse amount of parts in many areas of the world. Some parts, however we trust to specialists. In these instances the externally-produced parts for your CPC Pumps carry the same guarantees, and go through the same rigorous testing standards as the parts we manufacture in-house.

Testing

At the conclusion of service we will run your pumps through tests for:

- Hydrostatic Pressure
- Hydraulic Performance
- Vibration
- Mechanical Reliability

Maintenance Repair & Testing

Repairs – there when you need us

Preventative maintenance – the key to ensuring long-term performance

Push-pull service and emergency repair

Parts storage

We understand that not all facilities have the space to store long-lead, capital spare parts. We are happy to offer parts storage at any of our CPC-affiliated facilities throughout the globe. We'll work with you to identify the critical spares you will need, and where to store them for easiest / most convenient access.

Upgrades & Rerating

CPC Pumps are designed to perform reliably and efficiently for decades. During that time, process conditions, plant performance and pump duties can change. CPC's Aftermarket Service Team can modify your current equipment to meet new targets in performance and efficiency.

On-site Virtual Imaging

Utilizing state-of-the-art 3-D Scanners, CPC Pumps technicians can scan any part on or in your machinery, creating a model that's immediately sent to our engineering department for further examination and diagnostics to rapidly expedite the remanufacturing of critical components.
